SUBJECT Electric Lines;  
Ovidiu Power Plant

NO. OF PAGES 1

NO. OF ENCLS. 1 sketch  
(LISTED BELOW)

25X1A

SUPPLEMENT TO  
REPORT NO.

25X1X

1. Work on the Cernavoda Canal in the region of Ovidiu near Constanta involved the erection of high tension electric lines, and the construction of the Ovidiu power plant, which plant supplies current through the above lines to Constanta. The lines have electric tension of 6, 15, and 30 kilowatts. About one thousand five hundred workers were involved in the erection of these lines.
2. The Ovidiu power plant has a Swiss made Sultzer Oerlikon engine. Swiss technicians with the aid of Rumanian technicians completed the power plant in the autumn of 1950. Presently Swiss and Rumanian technicians are working at the Constanta power plant.
3. The Ovidiu power plant has four meters of 2,800 horsepower each. The plant is located near the village of Ovidiu about four kilometers from Constanta, and approximately 500 meters from Lake Siutghiol.
4. The informant worked on the electric lines erected between Mamaia and Ovidiu. About one kilometer on the right side of the road leading from Constanta to Navodari and one kilometer outside of Constanta, the informant noticed Soviet anti-aircraft gun emplacements.
5. Attached herewith is a sketch of the Constanta-Navodari area.
